Don't Miss out!

You asked for it, we listened...

Introducing the

Lifeguard Systems SAR Weight Harness System

- LGS SAR weight unit is easily secured to the LGS chest harness with 4 attachment points (Fastex Buckles).
- Divers can be on site with just the harness on, then quickly don the weight unit just prior to diving.
- Two rapid quick-release front pockets carry up to 15 lbs each.
- Replace weight pockets in seconds.
- Two rear trim pockets can hold an additional 15 lbs.
- Block or soft weight capable.
- When weights are released, they remain in their pockets, allowing divers to easily ditch their weights every time prior to exiting the water.
- Large weight release T-bar tabs for thick-gloved hands, and no snag hazards.
- The LGS chest harness has been proven in fast water for over 30 years and is used by the USCG, Canadian Navy, and thousands of PSD divers.

Introductory Sale Price: \$143.00

Introductory Retail: \$195.00

(complete LGS SAR Weight Harness System)

If you already own an LGS Chest Harness, you can purchase the SAR Weight Unit separately. The Harness easily attaches to the Weight Unit to create the LGS SAR Weight Harness System.

Introductory sale: SAR Weight unit without Harness: \$89.95

Introductory retail: \$139.00

Ursuit Surface Immersion Suit

Excellent for Law Enforcement,
Military & Fire Teams

Stop buying poorly made surface suits!

(Lifetime warranty on all seams & the Gore-Tex material warranty)

Material: Gore-Tex® fabric based upon the ePTFE membrane, allowing vapor to get through but remaining completely watertight. Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100 % watertight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assure visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

Boots: Polyurethane boots with broad fitting and strong non slip soles. Optional: Hard sole with latex exterior & 4mm neoprene insulation.

Knee and back reinforcements: Cordura.

Thermal hood: 3 mm neoprene hood, which protects against cold water. Attached hood, which protects against wind and rain

SALE PRICE: \$ 1470.00

Available in
Orange: #5106

**Strong and very comfortable
