## Aquatic Death and Homicidal Drowning Investigations

**Tragic accident or homicide?**

For all Dive Team members and Law enforcement personnel including:  
**Detectives, Patrol Officers, Crime Scene Technicians,  
Medical Examiners, Coroners, and Prosecutors.**

**Drowning is the second most common cause of accidental death to children and 3rd for adults.**

Our research shows that an estimated **twenty percent of child & women drowning incidents may be homicides.**

### What were you taught about Body-Found-In-Water Investigations?

- Is it a body dump or a drowning? State-of-the-art diagnostics of drowning
- What to photo and document on body & scene
- Bathtub, bucket, toilet, pool, & openwater incidents.
- SIDS or Homicidal Drowning?
- Preservation of possible water crime scene
- What happens to submerged bodies and evidence?
- Submerged evidence recovery / processing (DNA, weapons, fabrics, pollen etc.).
- Was it not there, or did the dive team miss it?- How to tell the difference
- Indications of homicides by drowning.
- Autoerotic aquatic asphyxia and aquatic sexual sadism

*Too few cases are investigated with body-in-water knowledge, and even fewer end in convictions.*

*If there is an investigation, it normally begins days to months after the incident, which means critical scene evidence is likely lost.*

*Without training in the specifics of homicidal drowning red flags most incidents will appear accidental. Learn what information to collect on every drowning or body-found-in-water scene.*

*This program will change the way you look at and manage water-related incidents.*

**This is a program you cannot afford to miss!!**
